Yusuf Odetola

Frontend Developer | React, Next.js, TypeScript | Building Responsive Web Applications
Ibadan, Oyo State, Nigeria +2348169587914 odetolayusuf02@gmail.com github.com/yusufodetola
LinkedIn Portfolio

Summary

Frontend Developer with practical experience building responsive, scalable, and user-focused web applications using modern technologies such as React, Next.js, TypeScript, and TailwindCSS. Skilled in translating UI/UX designs into high-performance digital products while maintaining clean and maintainable codebases. Trained at Notzero Academy where I graduated as the best student. Currently expanding expertise in UX Design through Coursera and AI automation.

Experience

Frontend Developer – Notzero Academy **May 2026 – Present**

Full time, Remote

- Built responsive and scalable web applications for academy projects and client-based solutions using modern frontend technologies.
- Developed 10+ interactive UI components and pages using React and Next.js, improving user experience and performance
- Translated UI/UX designs into clean, maintainable, and production-ready code with strong attention to responsiveness
- Integrated REST APIs and implemented reusable component structures to improve development speed and consistency
- Optimized application performance and mobile responsiveness, reducing layout issues and improving cross-device compatibility
- Collaborated with mentors and developers on product development, code reviews, and feature implementation

Freelance Frontend Developer – Upwork **May 2026 – Present**

Self-employed, Remote

- Built and delivered responsive frontend solutions for international clients on remote freelance projects using React, Next.js, and TailwindCSS
- Converted UI/UX designs from Figma into pixel-perfect, mobile-friendly web interfaces with strong attention to detail
- Developed reusable components and scalable frontend architectures to speed up project delivery and improve maintainability
- Integrated REST APIs and third-party services to create dynamic and interactive user experiences
- Collaborated directly with clients to gather requirements, provide project updates, and implement feedback efficiently
